## SKILLS

**Python · C · SQL**
Data Structures · Algorithms
Object-Oriented Programming
Machine Learning · AI
Scikit-learn · Pandas
Flask · Django · MySQL
HTML · CSS · JavaScript
OpenCV · Arduino Mega · ESP32
Streamlit

## EDUCATION

**B.Tech, Computer Science and Artificial Intelligence**
Babu Banarasi Das University, Lucknow
2023 – present · GPA 8.00/10.00

**Intermediate, 2022**
Gola Public Inter College, Gola

## CERTIFICATIONS

Building RAG Apps Using MongoDB (2026)
Data Science and AI, 90 hrs, GRAStech (2026)
SkillUP 101: Python, EDUCBA (2024)
HTML 101, CraftMyPDF (2021)

# Aniket Shukla

**B.Tech Computer Science & Artificial Intelligence**

## PERSONAL PROFILE

Motivated B.Tech Computer Science and Engineering (Artificial Intelligence) student with hands-on experience in Artificial Intelligence, Machine Learning, and Software Development. Skilled in Python, C, SQL, Data Structures, Algorithms, and Object-Oriented Programming, with a passion for building scalable, user-centric software solutions. Successfully developed multiple AI-based projects, including an AI-enabled RoboDog, Placement Predictor, and ARIA – an intelligent task management assistant, demonstrating strong analytical thinking, software design, and problem-solving abilities. A quick learner with excellent collaboration, debugging, and communication skills, committed to delivering high-quality software and contributing to innovative engineering teams.

## PROJECTS

### AI-Enabled RoboDog

*Tech Stack: Python, C, Arduino Mega, ESP32, OpenCV, Embedded Systems*

Developed an AI-enabled RoboDog integrating 10+ sensors and embedded modules for autonomous navigation, obstacle detection, and line following. Optimized real-time control algorithms and hardware-software communication, improving navigation reliability and system performance. Collaborated in designing, debugging, and testing an AI-driven robotics solution using modular software engineering practices.

### Placement Predictor

*Tech Stack: Python, Scikit-learn, Pandas, C, Flask, HTML/CSS*

Built a machine learning-based Placement Predictor analyzing 10+ academic and skill parameters to estimate placement probability. Improved prediction accuracy through data preprocessing, feature engineering, and model evaluation using Scikit-learn. Developed a responsive web application with an intuitive interface for real-time prediction and efficient backend processing.

### ARIA – ToDo Planner

*Tech Stack: Python, Django/Flask, MySQL, HTML, CSS, JavaScript*

Developed ARIA, an AI-powered task management application with intelligent scheduling, reminders, and priority-based task organization. Designed scalable backend services, secure database integration, and responsive user interfaces following Object-Oriented Programming principles. Enhanced productivity through AI-driven task prioritization and modular software architecture for improved maintainability.

## ACHIEVEMENTS

- Runner-up – BBDU Hackathon for developing an AI-based solution.
- Winner of multiple Inter-University Hindi Debate Competitions.
- Developed 3 AI-based projects solving real-world problems.
- Represented the university in inter-college technical and literary events.
- Participated in hackathons, workshops, and technical competitions.
- Demonstrated strong leadership, teamwork, and problem-solving through collaborative projects.
- Head of discipline team in cultural club – AAINA.

## ALSO

Shortlisted team member, Internal Hackathon for Smart India Hackathon 2026 (BBDU). Discipline team work at IPL, concerts and large events. Live ML apps (Streamlit) and ARIA demo are linked on my portfolio.
